

Sample PDF Document

This is a sample PDF document created for testing the PDF Processor API.

Key Features:

- FastAPI backend with async processing
- Redis Streams for message queuing
- PyPDF for text extraction
- Google Gemini for AI analysis
- Docker containerization

The application can extract text from PDFs and analyze it using artificial intelligence to provide insights, summaries, and key points.

This technology stack enables scalable, asynchronous processing of PDF documents with real-time status updates and comprehensive analysis capabilities.

Thank you for testing the PDF Processor API!
